SUMMARY

Junior Software Engineer with **1+ year** of experience developing **enterprise software** applications in the **healthcare and radiology** domain. Worked across multiple technology stacks, developing and contributing to new features across real-time communication systems, automated messaging services, and deployment automation.

EXPERIENCE

LiveMedica Solutions

Junior Software Engineer

July 2025 – August 2026

Chennai, Tamil Nadu

Internal Radiology Chat System

- Independently built a real-time chat system for an entire facility's radiology workflow using **Vue 3, Node.js, and PostgreSQL**, delivering instant chat, an on-device **smart-reply engine**, and role-based access control.

Communication Outbound Service

- Engineered a communication service with **multi-tenancy** and per-customer credential isolation, automating **50,000 emails, SMS, and fax per month** to notify doctors and patients when their reports are approved — built in C++ with reliable, **automated delivery**.

Ubuntu Installer & Deployment Automation

- Developed a shell-script-based Ubuntu installer that automated the complete client setup — dependency resolution, configuration, database population, and service provisioning — cutting deployment time from **6 hours to a single 45-minute run** across client demo machines.

Medical Image Enhancement with C++

- Built a C++-based medical image enhancement module using the **CLAHE algorithm**, improving output accuracy and image quality while expanding supported image formats and improving processing performance.

PROJECTS

DevInsight – AI Developer Career Analyzer [Live Demo](#)

- Built an AI-powered career analyzer using **React, FastAPI, and Python** that analyzes resumes, GitHub profiles, and portfolios to generate **actionable career insights**.

KickArt

- Developed a full-stack e-commerce platform using Django, JavaScript, and SQLite, featuring a dynamic product catalog, user authentication, and CRUD operations with responsive, interactive UI.

YouTube Clone

- Developed a responsive YouTube clone focused on frontend development, using HTML, CSS, and JavaScript for dynamic content rendering, custom UI components, and enhanced user interaction.

SKILLS

Programming Languages : C++, Python, JavaScript, SQL

Web Technologies : HTML, CSS, Bootstrap

Development & Scripting : Shell Scripting, Linux, Git, VS Code

CERTIFICATIONS

- Artificial Intelligence Fundamentals – IBM SkillsBuild (June 2026)
- Database Management System – NPTEL
- Full Stack Development with Python – NPTEL
- Frontend Development with HTML

EDUCATION

Sri Krishna Adithya College of Arts and Science

Bachelor of Science (B.Sc.) – Information Technology

2021 – 2024

CGPA: 8.0
